Core Skills

- Problem solving
- UX
- SQLServer
- TypeScript
- React.js
- Next.js
- TailwindCSS

Professional Profile

An enthusiastic IT student in the final year of a Computer Science Engineering program, with solid expertise in front-end technologies such as React and TypeScript. I have also developed strong backend skills, particularly with Next.js and SQL Server. My practical experience with these tools, along with a well-rounded technical foundation, drives my passion for technology. Over the course of my studies, I have completed a variety of projects, including a language learning platform and a recipe app developed in React Native, demonstrating my ability to create efficient and functional systems. I am excited to bring my skills and enthusiasm to any IT department I join.

Education

- **Bachelor of Engineering in Computer Science** | Uniwersytet Kaliski | Oct 2021 - Mar 2025 | During my engineering studies in Computer Science, I gained extensive knowledge and practical skills in key areas of the field. I studied advanced algorithms and object-oriented programming, primarily using Java. As part of my coursework, I developed Android applications in Java, which helped me build expertise in mobile programming. I also worked with SQL Server databases, learning how to design and manage relational databases. Additionally, I was introduced to PHP and the basics of the Laravel framework, which enabled me to create dynamic web applications.

Career Summary

Aug 2023 - Present   **Helpfind, Ostrów Wielkopolski**
Front-end Developer

Outline

During my time at the company, I contributed to the development of a CRM system using React, while also creating websites with Next.js. My work involved both enhancing the CRM and building dynamic, responsive web pages.

Key Responsibilities
- Developed and refined reusable components, enhancing both the efficiency and uniformity of the codebase.
- Collaborated with designers using Figma to implement projects according to visual requirements.
- Played a key role in migrating the CRM system to a modern tech stack, significantly improving its performance and user experience.

Key Achievements
- Delivered a high-impact project, leading to increased customer engagement with the new portal.
- Successfully launched two websites, ToTwojaKasa and Helpfind, using Next.js.
